PIEGA **TMicro**

The clever space saving series

The new column loudspeaker

TMicro 6

The latest slim column loudspeaker model is called TMicro 6. Besides the classic aluminium housing, the neodymium tweeter and the precisely tuned frequency crossover, a slim filigree column loudspeaker has for the first time been equipped with a triple bass cone, making for an unexpectedly large improvement in sonority. Thanks to this, the TMicro 6 is extremely impressive in terms of competence, fullness and sensitivity, despite the low space requirement. The slim aluminium column loudspeaker fits perfectly into any furnishing style without fuss or bother – discreet, timeless and elegant.

Column loudspeaker

TMicro 5

The TMicro 5 column loudspeaker boasts the same slim design, and has similar structural features to the TMicro 6. With its filigree exterior, the speaker is designed for smaller areas or those with modest space conditions, and reproduces all music styles with a great deal of joy and lightness, while still maintaining impressive efficiency. The double bass cones ensure that low waves are reproduced with precision and naturalness. All in all, the TMicro 5 provides impressive stand-alone musical conversion despite its minimal dimensions.

The new compact loudspeaker

TMicro 4

If you're looking for subtle, smaller wave converters – or you have minimum space available – but you are unwilling to dispense with sound quality, the new compact TMicro 4 loudspeaker is the perfect solution. This incredibly powerful compact loudspeaker is a modest +/- 28 cm high, only 14 cm wide and 17 cm deep, yet it provides natural and lively sound reproduction thanks to its seamless housing, neodymium tweeter and technically advanced bass drivers.

Compact loudspeaker

TMicro 3

The smallest of the Piega loudspeakers is the TMicro 3, measuring 19 x 12 x 13 cm. As is the case for its bigger «brothers», this loudspeaker features a seamless housing made from aluminium and an LDS tweeter together with a 10 cm bass chassis. The speaker provides a surprisingly full sound, and delivers top performance for its size. The «Benjamin» is at home on a shelf, on a desk, a sideboard, a window sill etc. and can be used in an office, living room or bedroom to spread musical happiness.

Centre loudspeaker

TMicro Center

The TMicro Center delivers powerful sound, is slim and graceful, and its size matches today's flat TVs perfectly. The loudspeaker features two 10 cm MDS bass cones and a 26 mm LDS tweeter. The TMicro Center is designed as a surround system, and together with the other TMicro components, makes every film a cinema experience. Naturally, it can also be used as a sound panel for a TV, which makes for striking sound quality and enjoyment of both conversation and music. A bracket is optionally available for «invisible» wall mounting.

Subwoofer with stereo amplifier

TMicro SUB

The small, yet powerful active subwoofer with a volume of 12 litres delivers the right support at extreme bass levels right down to 30 Hz. The stereo amplifier integrated in the subwoofer is both an absolute highlight and a practical feature. This allows the subwoofer and the TMicro column or compact loudspeakers to be combined with a flat screen, CD, DVD or MP3 player, iPhone, streaming server or computer to form a real mini hi-fi unit. Guaranteed quality sound even in reduced space conditions.

TMicro

Technical Data

Model	PIEGA TMicro 6	PIEGA TMicro 5	PIEGA TMicro 4
Design principle	3-way-system column loudspeaker	2-way-system column loudspeaker	2-way-system compact loudspeaker
Recommended amplifier output	20 – 150 watts	20 – 150 watts	20 – 150 watts
Sensitivity	90 db/W/m	90 db/W/m	87 db/W/m
